

jQuery Quiz I

1. In jQuery terminology, what is the difference between the “jQuery function” and the “jQuery object”?

- The jQuery function is the value of jQuery or of \$.
- The jQuery object is an object returned by the jQuery function. The jQuery object represents a set of document elements and can also be called a “jQuery result”, a “jQuery set”, or a “wrapped set”.

2. Write jQuery code to find all h1 elements that are children of a div element and make their background color red.

```
<body>
  <h1>abc</h1><br>
  <div>
    <h1>div-1</h1>
    <h1>div-2</h1>
  </div>
  <h1>xyz</h1>
</body>
```

```
<script>
  $(document).ready(function () {
    $("div > h1").css("background-color", "red");
  });
</script>
```

3. Use a jQuery method to insert the text "YES!" at the end of the <p> element.

```
<!DOCTYPE html>
<html>

<head>
  <script>
    // INSERT YOUR JQUERY CODE HERE
  </script>
</head>

<body>
  <p>Is jQuery FUN or what? </p>
</body>

</html>
```

```
<!DOCTYPE html>
<html>

<head>
  <script>
```

```
$(document).ready(function () {  
    $("p").append("YES!");  
});  
</script>  
</head>  
  
<body>  
    <p>Is jQuery FUN or what? </p>  
</body>  
  
</html>
```
